What is Claimed:

6.   (Currently Amended) ~~A terminal~~ An apparatus comprising: a terminal, said terminal having a first memory into which content is receivable, a second memory and a user interface operatively associated with said [memories] first memory and said second memory, such that a set of operations of said user interface in relation to said content received into said first memory is permitted by reference to said content, at least one of said operations permitted by said content being a transfer of said content to said second memory, wherein a set of operations of said user interface in relation to said [same] content when received into said second memory is similarly permitted by reference to said content.

7.   (Currently Amended) ~~A terminal~~ An apparatus as claimed in claim 6, further wherein said user interface is further operable to identify indicia associated with said content said permitted set of operations being determined therefrom.

8.   (Currently Amended) ~~A terminal~~ An apparatus as claimed in claim 6, wherein said first memory provides temporary storage of said content.

9-17.   (Canceled)

18.   (Currently Amended) ~~A user interface for a terminal~~, A machine-readable medium comprising computer-executive code that, when executed, provides a user interface for a terminal wherein the interface is operable in accordance with an indicia associated with content received by the terminal, said indicia being representative of a pre-determined level of control of content, to permit operations available to a user of said terminal in relation to said content, said operations including the transfer of said content from volatile storage, into which content is received from said network, to user accessible storage.

19-24.   (Canceled)

25.   (Currently Amended) ~~A terminal~~ An apparatus as claimed in Claim 7, wherein said first memory provides temporary storage of said content.

26 – 35 (Canceled)

36.   (Currently Amended)   ~~A method as claimed in claim 35~~ A machine-readable medium in accordance with claim 18, wherein said content and said indicia corresponding to said content are included in a datagram.

37.   (Currently Amended)   ~~A method as claimed in claim 36~~ A machine-readable medium in accordance with claim 18, wherein said indicia corresponding to content is a bit included in said datagram that has been set to a predetermined state.

38 – 40 (Canceled)
